Date 87.05.20		Norsk Data A.S PROGRAM DESCRIPTION		Page 2 of 4	
Product	Name SUBSYSTEM PACKAGE II	Reg. no. 210400B	Category STIN		

1 ERRORS CORRECTED

1.1 QED

- Some errors when reading a specified interval of lines from a file is corrected.
- An error when specifying 12 tabulator stops is corrected.

2 MODIFICATIONS

2.1 CHANGES

2.1.1 MAC and FMAC

The only change is:
listing of "empty" library marks is removed.

An empty library mark is a library mark or an expression of library marks that has the value FALSE, thereby skipping the code behind it up to next " " .

Date 87.05.20		Norsk Data A.S PROGRAM DESCRIPTION		Page 3 of 4	
Product	Name SUBSYSTEM PACKAGE II	Reg. no. 210400B	Category STIN		

2.2 CHANGED COMMANDS

2.3 NORD-PL

- The statement-
IF A NBIT <symbol> GO <integer pointer>;
does now generate correct code.
- The incorrect statements-
A BZERO; and A BONE;
does now generate an error message.
- If a MAC system symbol is used as subroutine entrypoint, a warning will be given by the NIRD-PL compiler about the symbol change.
- The error recovery after a source line > 128 characters is improved.
- The statements-
SYMBOL XY=1
...
A:=D+XY
does now generate correct code.

2.4 QED

- The edit character (CTRL)R which skip next "word" is changed to (CTRL)G.
- (CTRL)R now retypes the old and new line and awaits more edit characters (same as in command buffer editing in SINTRAN III).

3 INSTALLATION PROCEDURE

Delete the old :PROG and :BPUN versions of the products.

Use the BACKUP-SYSTEM to copy all the files to the user where the BPUN-files are kept. Standard user is user BPUN-FILES.

The BPUN files on the diskette may be dumped as :PROG files or dumped REENTRANT. The next sections will describe how this is done.

3.1 How to dump programs reentrant

Login as user SYSTEM and dump the files reentrant with following parameters:

Name:	Start,	Restart	adr:	File name:
1880D 70	70		(BPUN-FILES)	DITAP-1880D
F32-FMAC-1920C	-1	-3	(BPUN-FILES)	F32-FMAC-1920C
MAC-32-1626C	-1	-3	(BPUN-FILES)	F32-MAC-1628C
FMAC-1408D	-1	-3	(BPUN-FILES)	FMAC-1408D
MAC-1415C	-1	-3	(BPUN-FILES)	MAC-1415C
NPL	0	1	(BPUN-FILES)	NPL-1896D
QED	0	1	(BPUN-FILES)	QED-1644L

Example:

```
@DUMP-REENTRANT↓
NAME: QED↓
START ADDRESS: 0↓
RESTART ADDRESS: 1↓
FILE NAME: (BPUN-FILES)QED-1644L↓
```

3.2 How to dump programs as :PROG files

Login as user SYSTEM or user where :PROG files should be dumped and dump with same parameters as in section 3.1
Example:

```
@PLACE-BINARY, (BPUN-FILES)QED-1644L↓
@DUMP↓
FILE NAME: "QED"↓
START ADDRESS: 0↓
RESTART ADDRESS: 1↓
```
